BENEFITS OF INVESTING IN QUANTUM GOLD SAVINGS FUND (FUND OF FUND SCHEME)

- (i) **“Open door for non-demat a/c holders:** Investors can invest in this Scheme through the physical mode across the country thereby making it easily available and convenient **for non demat a/c holders”**
- (ii) **Systematic Investment Plan (SIP):** a long term disciplined investment technique under which you invest a fixed sum of money on a daily/ weekly/ monthly/ quarterly basis in the Scheme at the prevailing NAV. This allows the investor to save and invest regularly.

This investment technique enables the investor the following benefits:

- Small, regular investments: A simple way to enter the market by investing small amounts. Small but regular investments go a long way in creating wealth over time.
 - Rupee cost averaging: Fewer units during rising markets and more units during falling markets, thereby reduces the average cost per unit
 - No need for ‘timing the markets’: No need to select the right time and quantity to buy and sell as timing the market is time consuming and risky. It eliminates the need to actively track the markets.
- (iii) **Availability of add-on facilities:** Ease of availing add on facilities like Systematic Transfer Plan/ Systematic Withdrawal Plan / Systematic Investment Plan/ auto switch /trigger facility etc.
- (iv) **Liquidity:** An investor of Gold Savings Fund can subscribe and redeem units on all Business Days directly from the AMC, while purchase and sale of gold ETF units is a factor of liquidity on the stock exchange.

(v) Ease of investing: Investing in gold through Quantum Gold Savings Fund, the investor can directly subscribe/ redeem units through the physical mode at the various designated investor service centre across the country/ investing online thereby making it easily accessible and convenient.

(vi) Cost Effective: Investing in gold through the Quantum Gold Savings Fund in physical application mode enables the investor to invest in a low cost manner as the investor does not have to incur the following charges applicable for investing through the dematerialized mode.

Example if an investor subscribing Rs. 50,000/- each in Gold ETF through the dematerialized mode and Gold Savings Fund through physical application would incur following charges:-

Charges	Gold ETF through Demat Mode	Gold Savings Fund through Physical Application Mode
Account Opening Charges	Nil	Nil
Annual Maintenance charges of Demat Account	Rs. 0 - Rs. 1200	Nil
Delivery brokerage charges	Rs. 25 - Rs.300	Nil
DP Transaction charges	Rs. 25	Nil
Annual Scheme Recurring Expenses*	Rs.385	Rs. 495**
Total	Rs. 435 - Rs. 1910	Rs. 495

Delivery brokerage in the above example is in the range of 0.05% to 0.35%. The above charges may vary as per different brokers. Charges like trading account opening charges, goods and services tax, education cess, exchange levy and stamp duty is applicable on the transactions in dematerialized mode.

* Annual Scheme Recurring Expenses as shown above is as per the expense levied to Quantum Gold Fund ETF which is 0.78% p.a. as on September 30, 2023 thereby the expense charged to Quantum Gold Savings Fund - Direct Plan maximum would be 0.21% as the total expense under both the schemes would not exceed 1.00% p.a.

** Investment in QGSF $50000 \times 0.21\%$ + QGSF Investing in QGF - ETF $50000 \times 0.78\%$ = 105+390 = 495

A. RISK FACTORS

Standard Risk Factors

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price / value / interest rates of the securities in which the scheme invests fluctuate, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting the capital markets and money markets.
- Past performance of the Sponsor / AMC / Mutual Fund does not guarantee future performance of the scheme.
- The name of the Scheme does not in any manner indicate either the quality of the scheme or its future prospects and the returns. Investors are therefore urged to study the terms of offer carefully and consult their Investment Advisor before they invest in the Scheme.
- The sponsor is not responsible or liable for any loss or shortfall resulting from the operation of the scheme beyond the initial contribution of Rs.1,00,000/- (Rupees One Lac only) made by it towards setting up the Fund.
- The present scheme is not a guaranteed or an assured return scheme.

Scheme Specific Risk Factors

- The Scheme will invest predominantly in the units of Quantum Gold Fund (QGF), a mutual fund scheme Replicating / Tracking Gold - in the form of an Exchange Traded Fund. The Scheme's performance may depend upon the performance of QGF. Any change in the investment policy or the fundamental attributes of QGF could affect the performance of the Scheme. All risks associated with underlying scheme, including performance of their underlying physical gold, asset class risk, passive investment risk, indirect taxation risk, etc., will therefore be applicable in this Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying scheme.
- The Scheme's NAV will react to the gold price movements and movements in the NAV of Quantum Gold Fund. The factor that may affect the price of gold, among other things include demand and supply for gold in India and in the global market, Indian and foreign exchange rates, inflation trends, trading in gold as commodity, legal restriction on movement / trade of gold that may be imposed by RBI, Government of India or countries that supply or purchase gold to / from India, trends and restrictions on export / import of gold in and out of India, etc.
- The portfolio disclosure of the scheme will be limited to providing the particulars of the Quantum Gold Fund where the scheme has invested and will not include the investments made by Quantum Gold Fund. However, as the scheme proposes to invest only in underlying scheme, the underlying assets will by and large be physical gold.
- The investors of the scheme will bear dual loads i.e. those of the scheme and those of Quantum Gold Fund. Hence, the investor under the scheme may receive lower pre-tax returns than what they could have received if they had invested directly in underlying scheme in the same proportions.
- Although the units of Quantum Gold Fund are listed on the stock exchange, there can be no assurance that an active secondary market for Quantum Gold Fund will develop or be maintained.

- Trading in units of Quantum Gold Fund on the stock exchanges may be halted because of market conditions or for reasons that in view of stock exchange authorities or SEBI, trading in the units of Quantum Gold Fund is not advisable. In addition, trading of units of Quantum Gold Fund is subject to trading halts caused by extraordinary market volatility and pursuant to circuit filter rules of the stock exchanges and SEBI. There can be no assurance that the requirements of stock exchanges necessary to maintain the listing of the units of Quantum Gold Fund will continue to be met or will remain unchanged.
- The units of Quantum Gold Fund may trade above or below their NAV. The NAV of Quantum Gold Fund will fluctuate with changes in the market value of its holdings. The trading prices of the units of Quantum Gold Fund will fluctuate in accordance with changes in its NAV as well as market supply and demand for the units of Quantum Gold Fund. However, given that units of Quantum Gold Fund can be created and redeemed in Creation Units Size directly with Fund, it is expected that large discounts or premiums to the NAV of Quantum Gold Fund will not sustain due to arbitrage opportunity available.
- Any changes in trading regulations by the stock exchanges or SEBI may affect the ability of market maker to arbitrage resulting into wider premium / discount to NAV of Quantum Gold Fund.

Risk Associated with Investing in Debt and Liquid Schemes:

- The Scheme may invest in Debt and Liquid Schemes of Mutual Funds for liquidity purpose, hence all the risk associated with the underlying Debt and liquid schemes, including performance of the underlying Debt and liquid schemes, Interest Rate Risk/Market Risk, Credit Risk or Default Risk, Liquidity and Settlement Risks, Re-investment Risk, Performance Risk etc., will therefore be applicable to the scheme. Any changes in the investment policy or the fundamental attributes of the underlying Debt and liquid schemes could affect the performance of the Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying Debt and liquid schemes.

B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME

The Scheme / Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme / Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (MF) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

A. TYPE AND CATEGORY OF THE SCHEME

- a. Type of Scheme: An Open ended Fund of Fund Scheme investing in Quantum Gold Fund.
- b. Category of Scheme: Fund of Fund – Domestic

B. WHAT IS THE INVESTMENT OBJECTIVE OF THE SCHEME?

The investment objective of the scheme is to provide capital appreciation by predominantly investing in units of Quantum Gold Fund -Replicating / Tracking Gold which is an Exchange Traded Fund

The performance of Scheme may differ from that of Quantum Gold Fund and the domestic prices of gold due to expenses and certain other factors. There can be no assurance or guarantee that the investment objective of the Scheme will be achieved.

C. HOW WILL THE SCHEME ALLOCATE ITS ASSETS?

The investment policies of the Scheme shall be as per SEBI (Mutual Funds) Regulations, 1996, and within the following guideline. The asset allocation under the Scheme, under normal circumstances, will be as follows:

Instruments	Indicative Allocation (% to net assets)	Risk Profile
Units of Quantum Gold Fund	95% to 100%*	High
Money Market instruments, Short-term Corporate debt securities, Tri-Party Repo and units of Debt and Liquid Schemes of Mutual Funds	0% to 5%	Low to Moderately High

* As the scheme invests 95% to 100% of the net assets into the units of Quantum Gold Fund, the scheme will, by and large, be passively managed scheme.

It may be clearly understood that the percentages above are only indicative and not absolute.

The Scheme would invest in money market instruments, short-term corporate debt securities, Tri-party Repo and units of debt and liquid schemes of mutual funds, in order to meet the liquidity requirements of the Scheme.

Portfolio Rebalancing in case of deviation from Asset Allocation Under Defensive Consideration

The asset allocation pattern indicated above may change from time to time, depending on liquidity considerations or on account of high levels of subscriptions or Repurchase / Redemptions relative to Scheme size, or upon various defensive considerations including market conditions, market opportunities, applicable regulations and political and economic factors. These proportions may vary substantially depending upon the perception of the AMC the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and only for defensive considerations. In the event of deviations from the above asset allocation table, the Fund Manager will carry out rebalancing within 30 Calendar Days in accordance to para-No. 2.9 of SEBI Master Circular No. SEBI /HO/IMD/ IMD-PoD-1 / P/ CIR / 2023/74 dated May 19, 2023. However, at all the times the portfolio will adhere to the overall investment objectives of the Scheme.

Portfolio Rebalancing in case of Passive Breach

Pursuant to para-No. 2.9 of SEBI Master Circular No. SEBI /HO/IMD/ IMD-PoD-1 / P/ CIR / 2023/74 dated May 19,2023 In the event of deviation from the above asset allocation due to passive breaches (occurrence of instances not arising out of omission and commission of the AMC), the rebalancing shall be done within 30 Business Days. In

case the rebalancing is not done within 30 Business Days, then justification in writing including details of efforts taken to rebalance the portfolio shall be placed before the Investment Committee. The Investment Committee, if so desired, can extend the timelines upto 60 Business Days from the date of completion of 30 Business Days rebalancing period.

In case the portfolio of scheme is not rebalanced within the aforementioned mandated plus extended timelines, the AMC shall:

- i. not be permitted to launch any new scheme till the time the portfolio is rebalanced.
- ii. not to levy exit load, if any, on the investors exiting from the scheme.

AMC shall report the deviation to Trustees at each stage. Further, in case the AUM of deviated portfolio is more than 10% of the AUM of main portfolio of scheme:

1. AMC shall immediately disclose the same to the investors through SMS and email / letter including details of portfolio not rebalanced.
2. AMC shall also immediately communicate to investors through SMS and email / letter when the portfolio is rebalanced.

AMCs shall also disclose any deviation from the mandated asset allocation to investors along with periodic portfolio disclosures as specified by SEBI from the date of lapse of mandated plus extended rebalancing timelines.

D. WHERE WILL THE SCHEME INVEST?

Mode of Investment

Subject to the Regulations and the disclosures as made under the Section “How the Scheme will allocate its Assets”, the corpus of the Scheme can be invested in any (but not exclusive) of the following securities / instruments:

The Scheme predominantly invests in units of Quantum Gold Fund. The scheme may also invest up to 5% in debt, money market instruments and units of Debt and Liquid Schemes of mutual funds.

- a. Purchase of units of Quantum Gold Fund: The investments could be made either directly with the underlying fund or through the secondary market.
- b. The securities in which the Investment Manager may invest under the Scheme will be through the primary as well as secondary markets, private placement, preferential/firm allotments, auctions/book building and such others. These securities may be those listed on the various stock exchanges recognized by SEBI or to be listed securities and the investment will be in conformity with the pertinent rules and regulations, internal restrictions applicable at the time of making the investment.

The AMC uses a “passive” approach to try and achieve the scheme’s investment objective.

E. WHAT ARE THE INVESTMENT STRATEGIES?

Investment Strategy / Philosophy

The AMC uses ‘passive’ approach to try and achieve the Scheme’s investment objective. The Scheme would predominantly invest in the units of Quantum Gold Fund. The AMC does not make any judgments about the investment merit of a Quantum Gold Fund nor will it attempt to apply any economic, financial or market analysis.

Passive approach eliminates active management risks in regards to over / underperformance vis-à-vis the benchmark.

The Scheme will buy / sell units from the underlying scheme i.e. Quantum Gold ETF in Creation of Unit Size or through the secondary market through stock exchange route to achieve the investment objectives. The Scheme would endeavor to stay invested in the underlying scheme practically to the maximum extent possible at all times. However, the Scheme would also maintain some funds for meeting expenses and redemption purposes, in order to meet the liquidity requirements of the Scheme as prescribed in the Asset Allocation.

Quantum Gold Fund which is the underlying investment of this Scheme endeavors to track domestic prices of gold by investments in physical gold. It is also a passively managed scheme. On an average the Quantum Gold Fund has been 99.99% invested in gold since its inception in February 2008. This track record in terms of the investment allocation to physical gold evidences the extent to which the fund attempts to track the underlying.

Tracking error means the variance between returns of the underlying benchmark (gold ETF units in this case) and the NAV of the Scheme for any given period.

Tracking Error means the extent to which the NAV of the Scheme moves in a manner inconsistent with the movements of the benchmark on any given day or over any given period of time due to any cause or reason whatsoever including but not limited to expenditure incurred by the scheme, payouts of IDCW if any, whole cash not invested at all times as it may keep a portion of funds in cash to meet redemption etc. Tracking error quantifies how closely a manager's return pattern follows that of a benchmark index, and is defined as the standard deviation of the funds excess return over the underlying / benchmark index return.

Given the structure of Quantum Gold Fund, the AMC expects the tracking error to be lower. The AMC will endeavor to keep the tracking error as low as possible. Under normal circumstances, such tracking errors (with respect to the underlying i.e. Quantum Gold Fund) are not expected to exceed 2% per annum. However, this may vary when the markets are very volatile and also when the inflows / outflows in the fund are too excessive.

A tracking error may result due to conditions that are beyond the control of the fund manager:

(a) The Scheme would buy the underlying units on the exchange platform. The price at which the Scheme buys underlying units and its NAV (based on London AM fix and RBI reference rate) are likely to be different thereby causing deviation and creating tracking error.

(b) The underlying units bought will incur a brokerage cost which would again lead to deviation in the Scheme and the underlying NAVs.

(c) Tracking error would also arise on account of time lag between allotment of NAV to the investor and availability of actual funds for deployment as explained in above para. On account of this time lag, the procurement price of the underlying units would be different than the NAV at which allotment is made leading to tracking errors.

RISK CONTROL / RISK MANAGEMENT STRATEGY

Risk is an important part of investment function. Effective risk management is critical to fund management for achieving financial goals. Investment made by the Scheme shall be made in accordance with investment objective of the Scheme and provisions of SEBI (Mutual Funds) Regulations, 1996.

The Fund has identified the following Risks and designed Risk Management Strategy which is the part of the investment process to manage such risks.

Type of Risks	Risk Management Strategy
<p>Risk of deviating away from the investment objective of tracking gold prices through investments in units of Quantum Gold Fund (ETF)</p>	<p>The approach adapted to managing the Scheme would be a passive investment approach. The Scheme endeavors to stay near fully invested at all times.</p> <p>Brokerage paid for buying units on the exchange may also lead to increase in deviation. To mitigate the same, the Scheme will analyze from time to time different ways of taking exposure to units of Quantum Gold Fund from the perspective of risk and return and decide the same in the best interest of investors. For e.g. : Investing directly with the fund by purchasing and delivering physical gold to create / purchase new units whenever possible will help to avoid payment of any brokerage charges.</p> <p>However, the bid ask spreads in the underlying units and time lag for availability of fund for deployment may lead to small deviations.</p>
<p>Price Risk</p>	<p>Buying / selling on the exchange: On account of the usual bid-ask spread, the Scheme may pay / receive premium / discount while purchasing / selling the underlying units on the exchange.</p> <p>The fair value of the units of the Quantum Gold ETF would be calculated on a real time basis and orders would be placed near the real time fair value to avoid overpaying while purchases or receiving less while selling other than a reasonable bid ask spread.</p> <p>Buying / selling directly through the Quantum Gold Fund There is price risk involved when buying physical gold for purchase of units on account of the possibility of the difference between the purchase price of gold and the gold price computed by the underlying fund for valuation purposes. The Scheme may choose to buy gold by placing the order to buy at London AM Fixing price which is used for valuation for the underlying fund and thereby avoid price risk to a greater extent.</p> <p>In case of redeeming units directly with the fund, the fund would deliver gold on a T+1 basis which causes time lag and also the same would have to be sold on the open market which can be at a premium / discount. However, the Scheme would usually sell the units on the exchange.</p>
<p>Liquidity Risk</p>	<p>It is found that sufficient liquidity is provided by the authorized participants of Quantum Gold Fund.</p> <p>In case of liquidity issues, the fund can opt for the alternative way of buying / selling units in exchange of the underlying. The underlying can then be bought / sold in order to deploy funds or to raise cash for redemptions.</p>

RECORDING OF INVESTMENT DECISIONS

The Investment Decisions are made by the AMC's portfolio team. The Portfolio Team comprises of the Fund Manager, who head the team, and the Associate Fund Manager as and when appointed by the AMC. The Investment decisions of the Scheme will be carried out by the designated Fund Manager.

The Managing Director and Chief Executive Officer is not involved in the investment decision making process.

The performance would be compared with the performance of the Benchmark and with peer group in the industry.

The MD & CEO/Fund Manager will make presentations to the Board of the AMC and the Trustees periodically, indicating the performance of the Scheme. The Board of AMC and Trustee will review the performance of the Scheme in comparison to the benchmark.

The MD & CEO / Fund Manager will bring to the notice of the AMC Board, specific factors if any, which are impacting the performance of the Scheme. PORTFOLIO TURNOVER

The scheme is an open-ended scheme. It is therefore expected that there would be a number of subscriptions and redemption on a daily basis that may require purchase and sale of the securities. Therefore, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.

Portfolio Turnover Ratio for last one year: **Not Applicable.**

M. INTRODUCTION TO GOLD FUNDS

Since the beginning of civilization, gold has been associated with wealth, prestige and power. It is a highly sought-after precious metal which, for many centuries, has been used as money, a store of value and in jewellery.

Even today, after gold has been officially delinked from currencies, it has a huge role to play in the global economy. Gold is still widely considered to be an asset whose intrinsic value and purchasing power will not be widely subjected to the vagaries of inflation. So, during times of high inflation or depreciating currencies, people have turned to gold as a store of value. As the economic factors which influence the value of gold is often contrarian to their impact on other financial assets, gold is used as an effective asset-allocation and diversification tool.

It comes as no surprise that gold is much sought after in today's uncertain times given its time tested history of being an effective portfolio diversifier and a store of value.

N. INTRODUCTION TO GOLD EXCHANGE TRADED FUND (ETF)

Gold ETFs are investment vehicles that provide exposure to physical gold. The underlying asset for the ETF is physical gold. So, the value of the ETF unit depends on the underlying value of the gold. They offer investors a smart way of investing in the gold bullion without the necessity of actually physically holding gold and storing it. It is akin to buying gold in demat form. The ETFs are passively managed, resulting in lower expenses, which translate to better returns for the investors. As the ETFs are listed on a stock exchange, any investor can buy it like an equity share through the broker.

Gold ETFs are essentially passively managed mutual fund schemes which follow an "in kind" creation / redemption mechanism. This "in kind" mechanism means that units are created and redeemed for exchange of physical gold. In other words, large investors / institutions can purchase units of Gold ETF by depositing the underlying physical gold

with the mutual fund / AMC. Also, large investor / institutions on redemption would receive the physical gold in exchange of units. This “in Kind” mechanism helps to track gold prices efficiently and limits the tracking error.

Long-term investors can diversify their portfolio at a low cost and be insulated from the impact of short-term trading activity. As the security is exchange traded, the fund does not incur extra transaction cost for buying / selling the underlying on account of frequent subscriptions and redemptions. Shorter-term investors can also avail of ETFs to improve their liquidity - they can trade intra-day at near NAV quotes.

The ETFs are also more economical for the investor. Apart from being highly transparent investment vehicles, The ETFs charge lower annual expenses. Over the long term, these cost advantages can compound into a significant difference for the investor.

O. QUANTUM GOLD FUND

Quantum Gold Fund is an open ended Exchange Traded mutual fund scheme Replicating / Tracking domestic market prices of gold through investments in physical Gold. The investment objective of the scheme is to generate returns that are in line with the performance of gold and gold related instruments, subject to tracking errors. The scheme invests at least 95% of its net assets in physical gold.

P. HOW QUANTUM GOLD FUND WORKS

Quantum Gold Fund is available in denominations corresponding to as low as 0.01 gram of gold per unit.

Quantum Gold Fund units can be bought and sold like an equity share on the exchange through any broker member’s terminal. Units purchased will get credited to investor’s demat account.

Units can be bought / sold at real time prices closely corresponding with the movement in gold prices as opposed to end of the day prices.

It offers investors a smart way of investing in the gold bullion without the necessity of actually physically holding gold and storing it. It provides investors as an excellent means for asset allocation by diversification into gold bullion with relative ease.
