### A. RISK FACTORS

#### Standard Risk Factors:

- Investment in Mutual Fund Units involves investment risks such as trading volumes, settlement risk, liquidity risk, default risk including the possible loss of principal.
- As the price /value / interest rates of the securities in which the scheme invests fluctuates, the value of your investment in the scheme may go up or down depending on the various factors and forces affecting the capital markets and money markets.
- Past performance of the Sponsor/AMC/ Mutual Fund does not guarantee future performance of the Scheme.
- Quantum Long-Term Equity Value Fund (QLTEVF) is the name of the Scheme and does not in any manner indicate either the quality of the Scheme or its future prospects and the returns.
- The sponsor is not responsible or liable for any loss resulting from the operation of the scheme beyond the initial contribution of Rs.1,00,000/- (Rupees One Lac Only) made by it towards setting up the Fund.
- The present scheme is not a guaranteed or assured return scheme.

#### Scheme Specific Risk Factors

The Scheme proposes to invest primarily in equity and equity related securities. The Scheme will, to the extent required to meet Repurchase / Redemption obligations or for want of immediate appropriate investment opportunities in equity or equity related instruments, also hold the funds in money market instruments or, subject to the limits as prescribed under the SEBI (Mutual Fund) Regulations, 1996, invest in units of liquid schemes under the Quantum AMC or any other Mutual Funds. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances. The inability of the Scheme to make intended securities purchases due to its inability to liquidate the cash equivalents in time could cause the Scheme to miss certain investment opportunities resulting, at times, in potential losses to the Scheme.

The Mutual Fund is not guaranteeing or assuring any returns. Trading volumes, settlement periods and transfer procedures may restrict the liquidity of the investments made by the Scheme. Different segments of the Indian financial markets have different settlement periods and such periods may be extended significantly by unforeseen circumstances leading to delays in receipt of proceeds from sale of securities.

**Risks attached with the use of derivatives:** As and when the Schemes trade in the derivatives market there are risk factors and issues concerning the use of derivatives that investors should understand. Derivative products are specialized instruments that require investment techniques and risk analysis different from those associated with stocks and bonds. The use of derivatives requires an understanding not only of the underlying instrument but of the derivative itself. Derivatives require the maintenance of adequate controls to monitor the transactions entered into, the ability to assess the risk that a derivative adds to the portfolio and the ability to forecast price or interest rate movements correctly. There is the possibility that a loss may be sustained by the portfolio as a result of the failure of another party (usually referred to as the “counter party”) to comply with the terms of the derivatives contract. Other risks in using derivatives include the risk of mis-pricing or improper valuation of derivatives and the inability of derivatives to correlate perfectly with underlying assets, rates and indices.

**Risks associated with stock lending:** The risks in lending portfolio securities, as with other extensions of credit, consist of the failure of another party, in this case the Approved Intermediary, to comply with the terms of agreement entered into between the lender of securities i.e. the Scheme and the approved intermediary. Such failure to comply can result

in the possible loss of rights in the collateral put up by the borrower of the securities, the inability of the Approved Intermediary to return the securities deposited by the lender and the possible loss of any corporate benefits accruing to the lender from the securities deposited with the Approved Intermediary.

Changes in Government policy in general and changes in tax benefits applicable to mutual funds may impact the returns to investors in the Scheme.

The Scheme may also invest in ADRs / GDRs as permitted by applicable government regulations, Reserve Bank of India and Securities and Exchange Board of India and with SEBI and RBI prior approvals as may be required. To the extent that some part of the assets of the Scheme may be invested in securities denominated in foreign currencies, the Indian Rupee equivalent of the net assets, distributions and income may be adversely affected by the changes in the value of certain foreign currencies relative to the Indian Rupee. The repatriation of capital also may be hampered by changes in regulations concerning exchange controls or political circumstances as well as the application to it of other restrictions on investment. Depending upon market conditions, there may be an increased risk of liquidity in the portfolio from time to time.

The Scheme may use derivatives instruments like Stock Index Futures or other derivative instruments for the purpose of hedging and portfolio balancing, as permitted under the Regulations and guidelines.

The AMC may, considering the overall level of risk of the portfolio, invest in lower rated / unrated securities offering higher yields. This may increase the absolute level of risk of the portfolio.

Securities which are not quoted on the stock exchanges are inherently illiquid in nature and carry a larger amount of liquidity risk, in comparison to securities that are listed on the exchanges or offer other exit options to the investor, including a put option. The AMC may choose to invest in securities which are to be listed that have the potential to generate attractive yields.

Unitholders in the Scheme are not being offered any guaranteed / assured returns and Investors are advised to consult their Legal /Tax and other Professional Advisors in regard to tax/legal implications relating to their investments in the Scheme and before making decision to invest in or repurchase the Units.

#### **Risk Factors Associated with Fixed Income and Money Market Instruments:**

**Interest Rate Risk / Market Risk:** Changes in interest rate may affect the Scheme's net asset value. Generally the prices of instruments increase as interest rates decline and decrease as interest rates rise. Prices of long-term securities fluctuate more in response to such interest rate changes than short-term securities. Indian debt and government securities markets can be volatile leading to the possibility of price movements up or down in fixed income securities and thereby to possible movements in the NAV.

**Credit Risk or Default Risk:** Credit risk or Default risk refers to the risk that an issuer of a debt instrument may default (i.e. the issuer will be unable to make timely principal and interest payments on the security). Because of this risk, bonds issued by non-government agencies are sold at a higher yield above those offered on Government Securities which are sovereign obligations and free of credit risk. Normally, the value of a debt instrument will fluctuate depending upon the changes in the perceived level of credit risk as well as any actual event of default. The greater the credit risk, the greater the yield required for someone to be compensated for the increased risk.

**Liquidity and Settlement Risks:** This refers to the ease at which a security can be sold at or near its true value. The primary measure of liquidity risk is the spread between the bid price and the offer price quoted by a dealer.

Different segments of the financial markets have different settlement cycle/periods and such settlement cycle/periods may be impacted by unforeseen circumstances, leading to Settlement Risk. The liquidity of the Scheme's investments

may be inherently restricted by trading volumes, transfer procedures and settlement periods. Reduced liquidity in the secondary market may have an adverse impact on market price and the Scheme's ability to dispose of particular securities, when necessary, to meet the Scheme's liquidity needs or in response to a specific economic event or during restructuring of the Scheme's investment portfolio.

**Re-investment Risk:** Investments in fixed income securities may carry re-investment risk as interest rates prevailing on the interest or maturity due dates may differ from the original coupon of the bond. Consequently, the proceeds may get invested at a lower rate.

This risk refers to the interest rate levels at which cash flows received from the securities in the Scheme or from maturities in the Scheme are reinvested. The additional income from reinvestment is the "interest on interest" component. The risk refers to the fall in the rate for reinvestment of interim cash flows.

**Performance Risk:** The value of, and income from, an investment in the Scheme can decrease as well as increase, depending on a variety of factors which may affect the values and income generated by the Scheme's portfolio of securities. The returns of the Scheme's investments are based on the current yields of the securities, which may be affected generally by factors affecting capital markets such as price and volume, volatility in the stock markets, interest rates, currency exchange rates, foreign investment, changes in Government and Reserve Bank of India policy, taxation, political, economic or other developments, closure of the Stock Exchanges etc. Investors should understand that the investment pattern indicated, in line with prevailing market conditions, is only a hypothetical example as all investments involve risk and there is no assurance that the Scheme's investment objective will be attained or that the Scheme shall be in a position to maintain the model percentage of investment pattern particularly under exceptional circumstances. The Scheme will endeavour to invest in highly researched securities offering relative yield for the commensurate risks. However, the erosion in the value of the investments/portfolio in the case of the debt markets passing through a bearish phase is a distinct possibility.

### **Risks associated with Securities Lending and Short Selling**

**Securities Lending:** It may be noted that this activity would have the inherent probability of collateral value drastically falling in times of strong downward market trends, rendering the value of collateral inadequate until such time as that diminution in value is replenished by additional security. It is also possible that the borrowing party and/or the approved intermediary may suddenly suffer severe business setback and become unable to honour its commitments. This, along with a simultaneous fall in value of collateral would render potential loss to the Scheme. Besides, there can also be temporary illiquidity of the securities that are lent out and the Scheme will not be able to sell such lent out securities until they are returned.

### **Risk Associated with Investing in Liquid Schemes**

The Scheme may invest in Liquid Schemes of Mutual Funds for liquidity purpose, hence all the risk associated with the underlying liquid schemes, including performance of the underlying liquid schemes, Interest Rate Risk/Market Risk, Credit Risk or Default Risk, Liquidity and Settlement Risks, Re-investment Risk, Performance Risk etc., will therefore be applicable to the scheme. Any changes in the investment policy or the fundamental attributes of the underlying liquid schemes could affect the performance of the Scheme. Investors who intend to invest in the Scheme are required to and deemed to have understood the risk factors of the underlying liquid schemes.

## **B. REQUIREMENT OF MINIMUM INVESTORS IN THE SCHEME**

The Scheme/Plan shall have a minimum of 20 investors and no single investor shall account for more than 25% of the corpus of the Scheme/Plan(s). However, if such limit is breached during the NFO of the Scheme, the Fund will endeavor to ensure that within a period of three months or the end of the succeeding calendar quarter from the close of the NFO of the Scheme, whichever is earlier, the Scheme complies with these two conditions. In case the Scheme / Plan(s) does not have a minimum of 20 investors in the stipulated period, the provisions of Regulation 39(2)(c) of the SEBI (Mutual Funds) Regulations would become applicable automatically without any reference from SEBI and accordingly the Scheme / Plan(s) shall be wound up and the units would be redeemed at applicable NAV. The two conditions mentioned above shall also be complied within each subsequent calendar quarter thereafter, on an average basis, as specified by SEBI. If there is a breach of the 25% limit by any investor over the quarter, a rebalancing period of one month would be allowed and thereafter the investor who is in breach of the rule shall be given 15 days' notice to redeem his exposure over the 25% limit. Failure on the part of the said investor to redeem his exposure over the 25% limit within the aforesaid 15 days would lead to automatic redemption by the Mutual Fund on the applicable Net Asset Value on the 15th day of the notice period. The Fund shall adhere to the requirements prescribed by SEBI from time to time in this regard.

These proportions may vary substantially depending upon the perception of the AMC the intention being at all times to seek to protect the interests of the Unitholders. Such changes in the investment pattern will be for short term and only for defensive considerations. In the event of deviations from the above asset allocation table, the Fund Manager will carry out rebalancing within 30 Calendar Days in accordance to para-No. 2.9 of SEBI Master Circular No. SEBI /HO/IMD/ IMD-PoD-1 / P/ CIR / 2023/74 dated May 19, 2023. **Limits for stock lending are:**

The Scheme, under normal circumstances, shall not have exposure of more than 50% of its net assets in stock lending. The Scheme may also not lend more than 5% of its overall stock lending exposure to any one intermediary to whom securities will be lent.

**E. WHAT ARE THE INVESTMENT STRATEGIES?**

**Investment Philosophy/Strategy**

The investment strategy of the Scheme will be to invest in a basket of stocks after using intensive fundamental analysis, both quantitative and qualitative, monitor the portfolio actively but not so as to engage in excessive trading, and control risk by keeping the portfolio adequately diversified (both in terms of the sectors included in the portfolio as well as with respect to the level of concentration of any particular investment).

The primary focus of the Scheme will be on companies that will typically be included in the S&P BSE 200 Index. Valuations will be developed based on the business of the company, the environment in which it operates the skills and resources of its management, the strength of its balance sheet and cash flow relative to its long term goals, and other fundamental sector criteria. Investments will be made in companies whose shares are undervalued when compared to long term valuation expectations. Investments will be sold when the Investment Manager believes the market price of the shares has exceeded its assessment of the long term value of that company, or if there are adverse changes to that company's management, prospects or the markets in which that company operates. This evaluation against market prices will tend to be based on fundamental criteria (dividend yields, price to earnings, price to cash flow, price to book value, and other different measures of share price ratios), relative to a company's peer group, its history and the overall equity markets.

Market liquidity will be an important tool to mitigate investment risk. Accordingly, a number of the companies in the portfolio may be included in the S&P BSE 200 Total Return Index that the Investment Manager will use as a Tier II benchmark, but this will not be a criterion for including a company in the Scheme's portfolio and the portfolio may not include some of the companies in the S&P BSE 200 TRI Index. There may, however, be situations where other factors make an investment attractive enough to cause the Investment Manager to purchase a stock despite a relatively low level of liquidity in that stock. In addition, as noted above, the Scheme may invest in securities which are to be listed.

The Scheme may seek investment opportunity in the ADR / GDR and Foreign Securities (maximum 10% of Net Assets) subject to SEBI (Mutual Funds) Regulations, 1996. The Scheme may use derivatives for the purpose of hedging and portfolio balancing (max. 5% of Net Assets) based on the opportunities available subject to SEBI (Mutual Funds) Regulations, 1996.

## **Investment Portfolio**

The Scheme's investment portfolio typically will consist of investments made in shares of "Indian companies" (defined as a company that is listed on a stock exchange in India or elsewhere and, if not located in India, has over 50% of its assets, revenues, or profits generated from operations in India). The Scheme will invest primarily in equity securities of Indian issuers listed on an Indian stock exchange, or on an approved over-the-counter exchange, including in the form of Depository Receipts. From time to time the Scheme may also invest in synthetic instruments, such as derivatives, as permitted under the SEBI Regulations, which are used to gain exposure to the stocks listed on the Indian stock exchanges, and in the shares of companies that are to be listed. The Board of Quantum AMC will from time to time review and approve the overall investment policy and strategy of the portfolio held by the Scheme. The Scheme will be subject to the investment restrictions prescribed under the SEBI (Mutual Fund) Regulations 1996.

While the majority of the assets will be invested in the securities of Indian companies, the Scheme may also invest in money market instruments or in units of liquid schemes under the Quantum AMC or any other Mutual Fund, subject to the applicable SEBI Regulation limits, for brief periods of time pending investment in equities or other securities more generally associated with the Scheme's portfolio.

The Scheme will also have the ability to invest in the following derivative products (provided these products are listed on a stock exchange); equity and index options, derivatives (including single-stock futures, index futures and currency futures). The Scheme will make such investments only when potential returns are appropriately high enough to justify such investments, in light of the Scheme's objectives. These types of investments will be less than 5% of the total assets of the Scheme. Securities acquired by the Scheme will primarily be denominated in Indian Rupees, although investments may also be made in other currencies, if justified under circumstances then prevailing.

Generally speaking, the portfolio will tend to include shares of 25 to 40 different companies, and the value of the holdings of any one company will tend to be in the range of 2% to 6% of the value of the portfolio. Particular sectors or industries will not be a significant factor in the decision to add a company to the Scheme's portfolio.

Although the Scheme will have the ability to invest in derivatives, it should be noted that the returns will always be dependent on market movements and hence the Scheme is not a typical market neutral "hedge fund". Furthermore, the under-developed nature of the derivatives market at this stage suggests that the Scheme is not likely to use derivative instruments in the near future. Investors seeking "market-neutral" hedge-fund Schemes or short-term investment strategies should not invest in the Scheme.

## INVESTMENT PROCESS AND RECORDING OF INVESTMENT DECISIONS

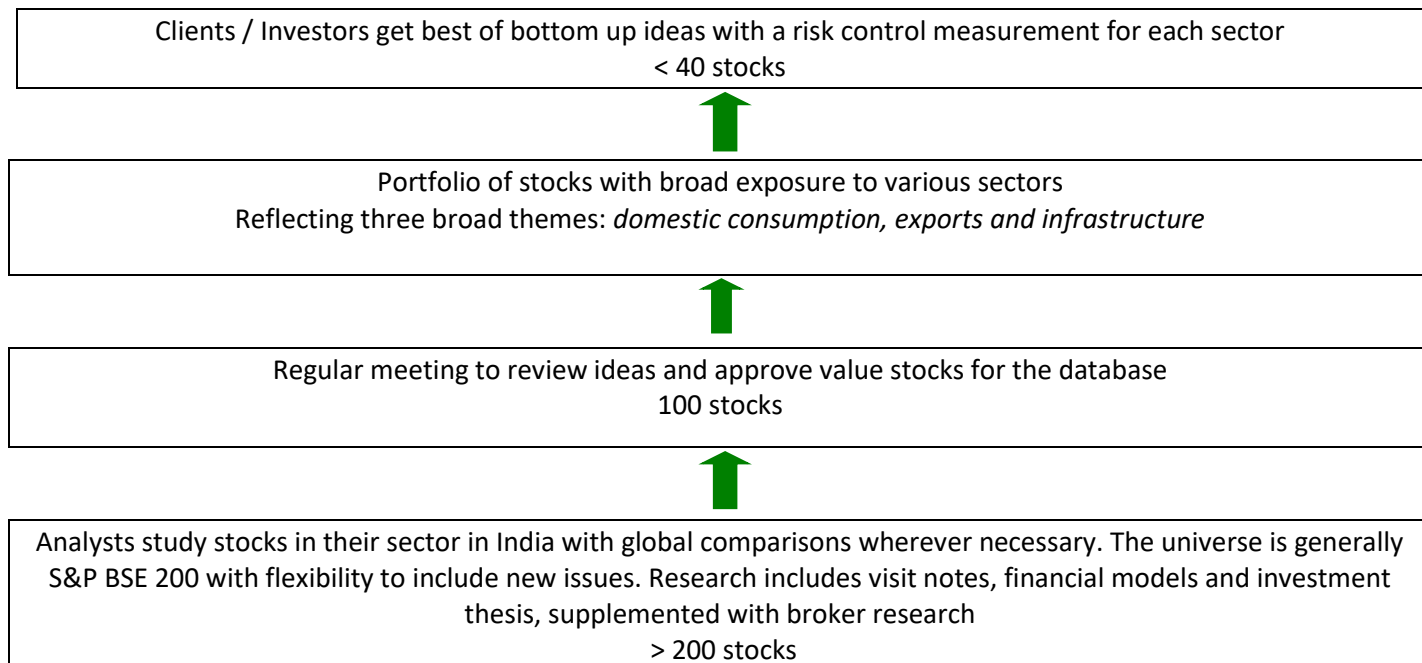

### INVESTMENT PROCESS

The investment process consists of:

1. Stock selection
2. Portfolio construction

#### 1. STOCK SELECTION

The AMC's stock selection approach is basically bottom up and is depicted below:

#### 2. PORTFOLIO CONSTRUCTION

1. Stock has to be under active and current coverage.
2. Every stock in the AMC's database has a pre – assigned Buy / Sell Limit. This is an INR price based on underlying fundamental sector criteria.
3. The AMC generally buys a new stock at the pre-determined Buy price (or below) and generally sells an existing stock at the pre-determined Sell price or above. It may add to a stock the Scheme already owns if it is between the pre-determined Buy and Sell price.
4. The AMC has adopted Tier -2 Benchmark – S&P BSE 200 TRI which demonstrate the Investment Style / Strategy of the AMC. The AMC is indifferent to whether a stock, the Scheme owns, is in the S&P BSE 200 TRI or not although it recognizes its effect on liquidity.
5. The AMC does not make sector calls. It makes stock calls.
6. With a range of 25 to 40 stocks the Schemes average holding is likely to be 2.5% to 4.0% per stock and the portfolio turnover is expected to be between 33% and 50% suggesting a 2.5 year's average holding period.

Income Distribution Cum Capital Withdrawal Option (IDCW) in turn offers two facilities namely;

- a) Payout of Income Distribution cum Capital Withdrawal (IDCW) Facility; and
- b) Reinvestment of Income Distribution cum Capital Withdrawal (IDCW) Facility.

**(i) Payout of Income Distribution cum Capital Withdrawal (IDCW) Facility**

Under this facility, income distribution distributed, if any, will be paid (subject to deduction of tax and statutory levy, if any) to those Unit holders, whose names appear in the register of Unit holders on the notified record date.

**(ii) Reinvestment of Income Distribution cum Capital Withdrawal (IDCW) Facility**

Unitholders opting for Income Distribution cum Capital Withdrawal Option may choose to reinvest the income distributed to be received by them in additional Units of the Scheme. Under this Facility, the income distribution due and payable to the Unitholders will be compulsorily and without any further act by the Unitholders, reinvested in the Reinvestment of Income Distribution cum Capital Withdrawal Facility (on the next Business Day after the record date), at a price based on the prevailing ex-Income Distribution Net Asset Value per Unit on the record date. The amount of income distributed re-invested will be net of tax deducted at source, wherever applicable. The amount of income distribution so reinvested shall constitute a constructive distribution to the Unitholders and a constructive receipt of the same amount from each Unitholder for reinvestment in Units. On reinvestment of income distribution, the number of Units to the credit of Unitholder will increase to the extent of the income distribution reinvested by the Applicable NAV as explained above.
